

HOW TIME FLIES

What if time was longer? What if an hour was seventy minutes and a minute ninety seconds? And a day had thirty hours in it, and a month had forty days and a year fifteen months? What if time not only stretched out but also got slower? Would it take longerrr forrrr youuu toooooo sayyyyyyyy sommmmmethinggggggg . . . nggg? (*Lifts arm through air very slowly.*) Orrrrr moooooooooove yourrrrrrrrrr arrrrrrrrr-ummm-ummm-ummm-ummm-ummm-ummm . . . ummm? It might be nice to have things slow down a little bit, last a little longer. Especially summer and weekends! And when you ate a candy bar, it could last way longer. But if time got too long, think how long it would be between birthdays! And you wouldn't be done with school until you were eighty-seven years old! Aaaahhh!
